

Youth
Marijuana Use
Associated
With Higher
Use of Other
Drugs

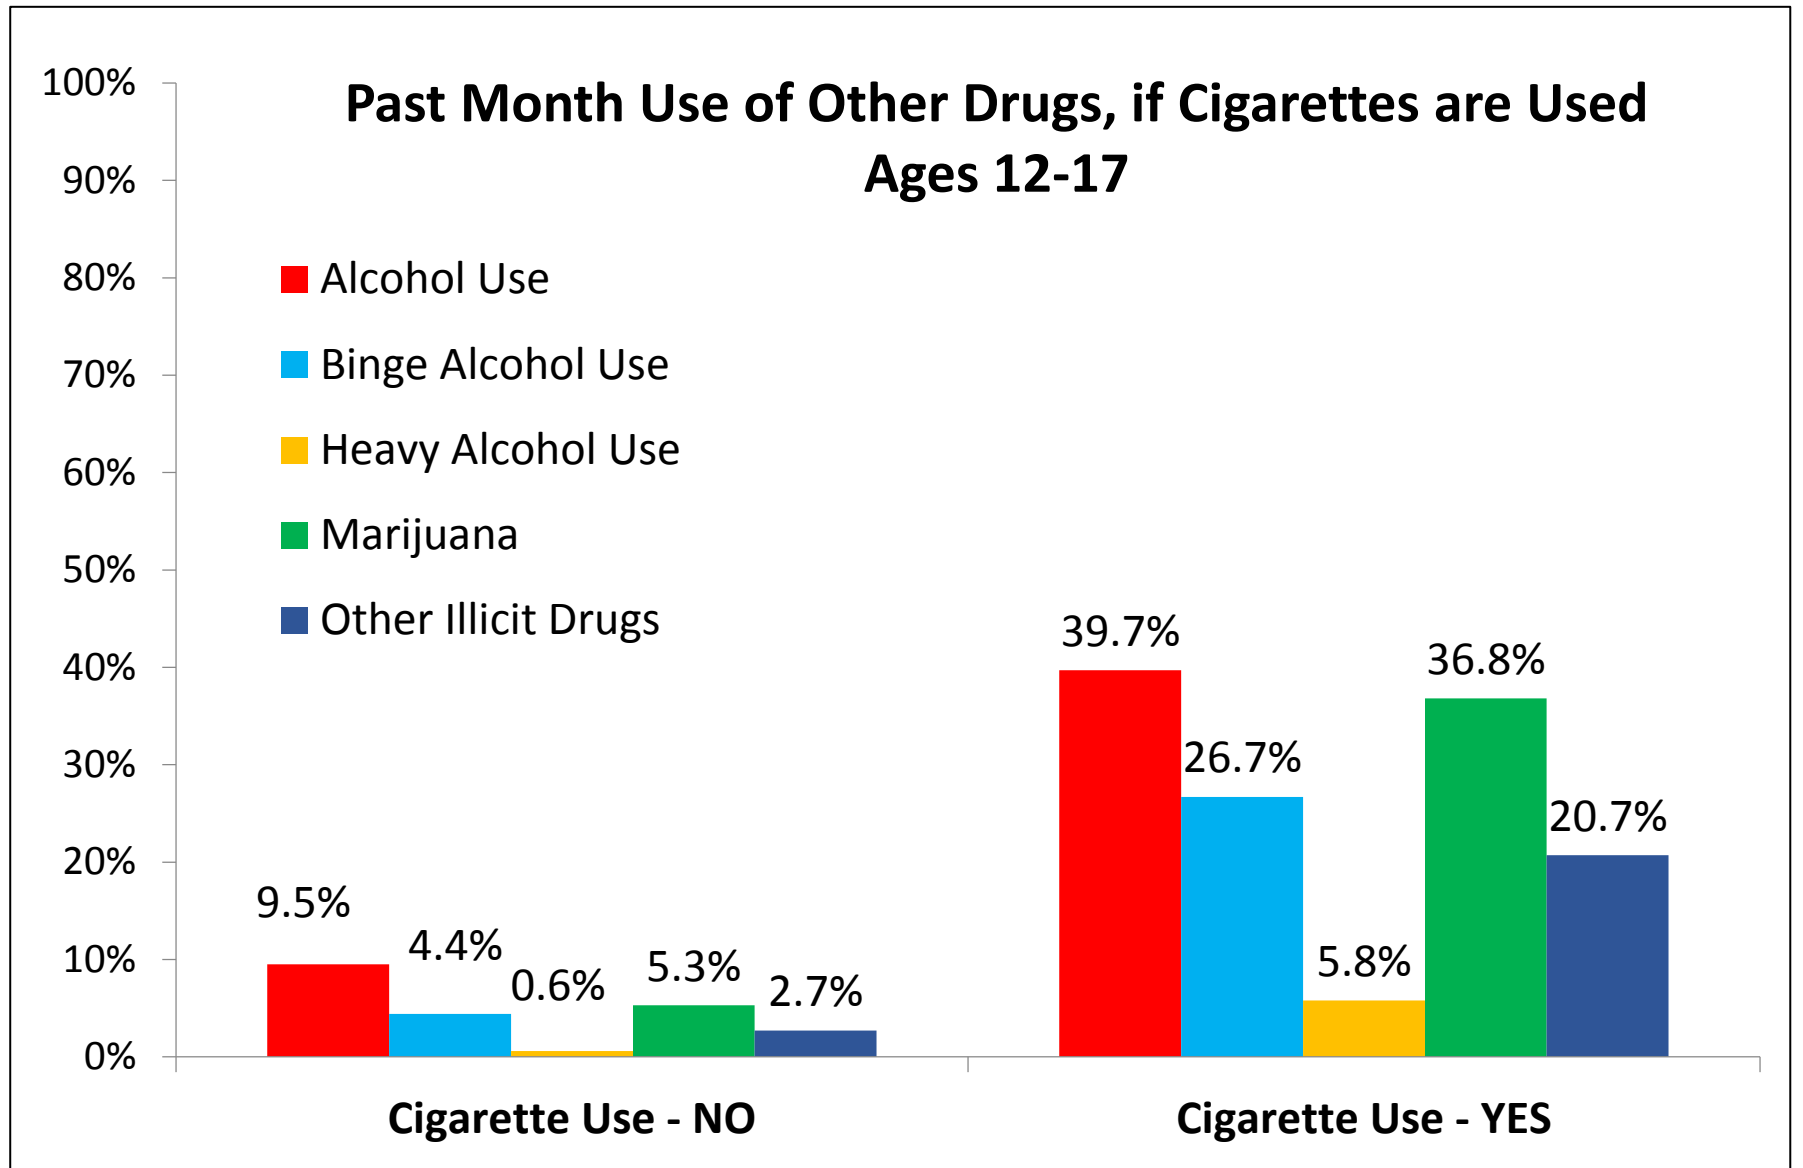

Data from DuPont, Han, Shea, Madras. Preventive Medicine 113: 68-73, 2018. [Graph prepared by BK Madras, C Shea]
Past month use of alcohol, tobacco and illicit drugs, among youth aged 12-17, by marijuana status (past month adjusted prevalence; n = 17,000; data from Table 1). Y-axis: past month prevalence in %)

Youth
Alcohol Use
Associated
With Higher
Use of
Other Drugs

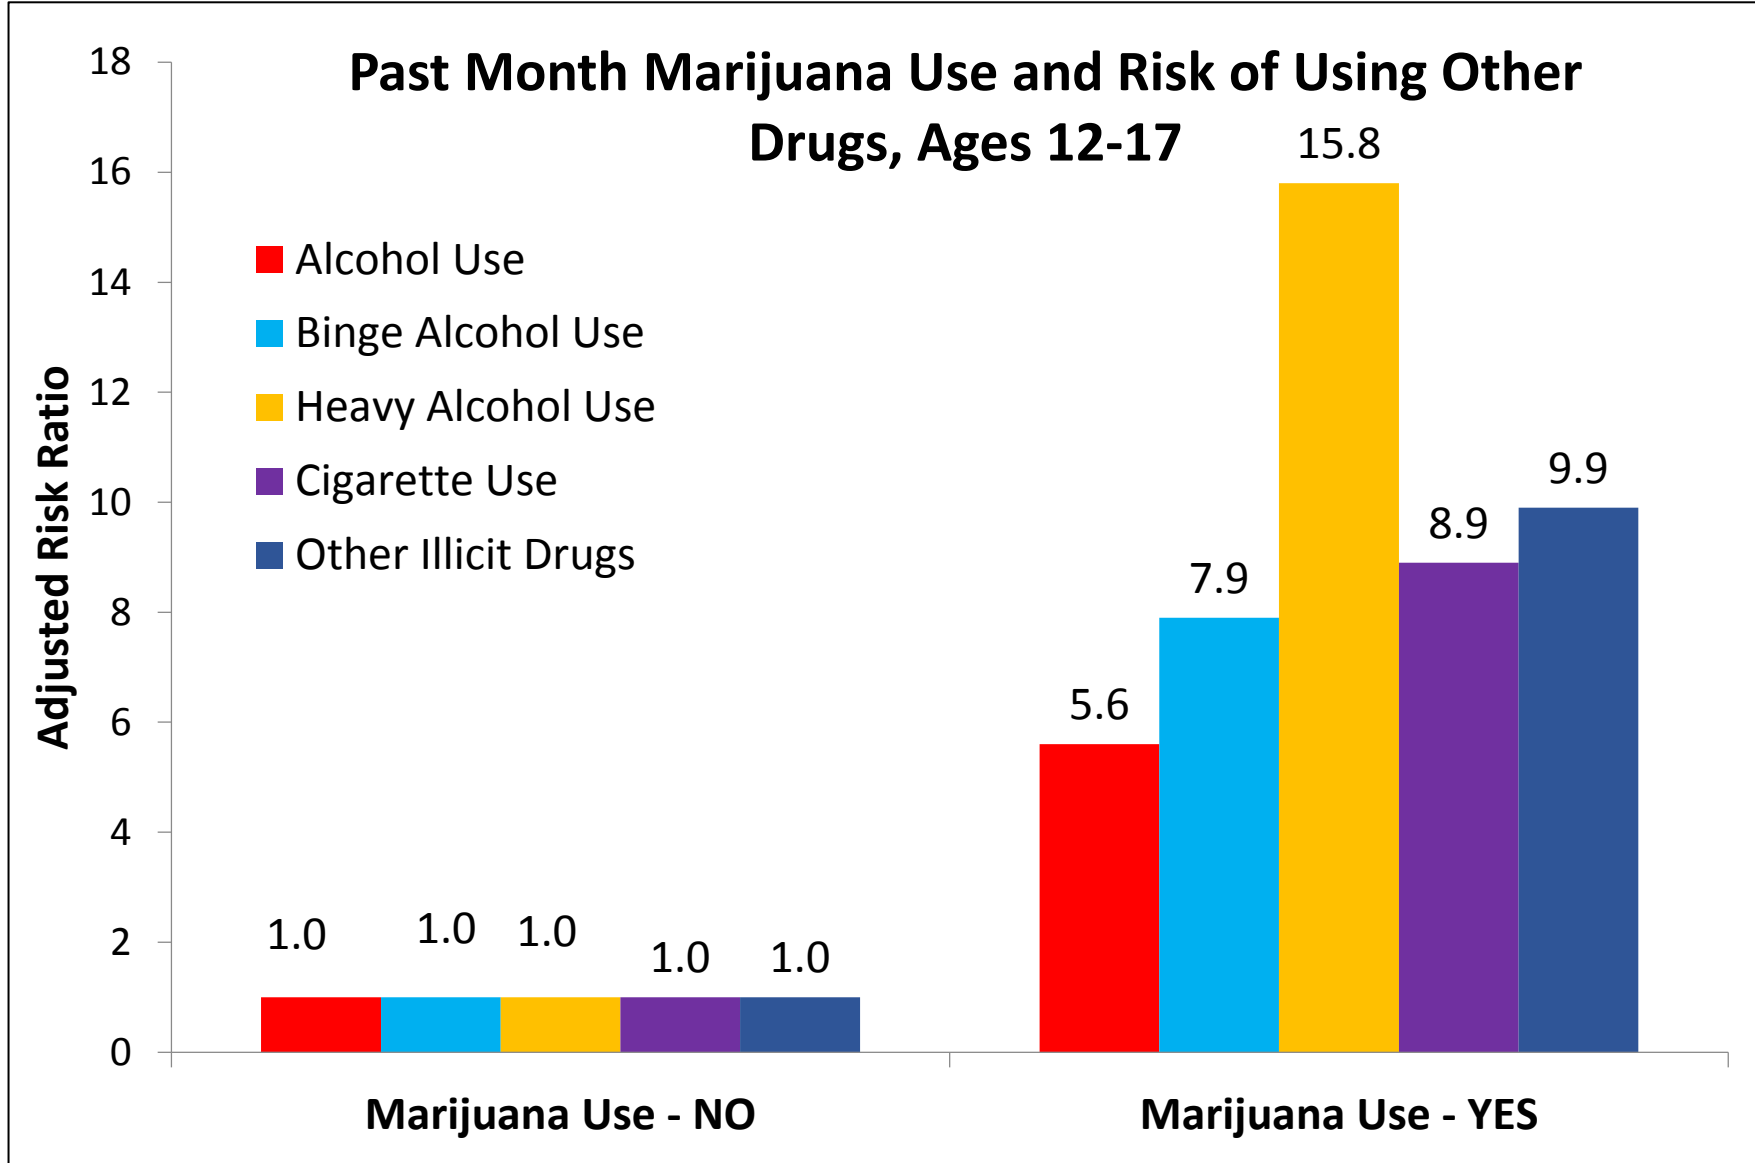

Data from DuPont, Han, Shea, Madras. Preventive Medicine 113: 68-73, 2018. [Graph prepared by BK Madras, C Shea]
Past month use of tobacco, marijuana and illicit drugs, among youth aged 12-17, by level of alcohol use (past month adjusted prevalence; n = 17,000; data from Table 2).

Youth
Smoking
Associated
With Higher
Use of
Other Drugs

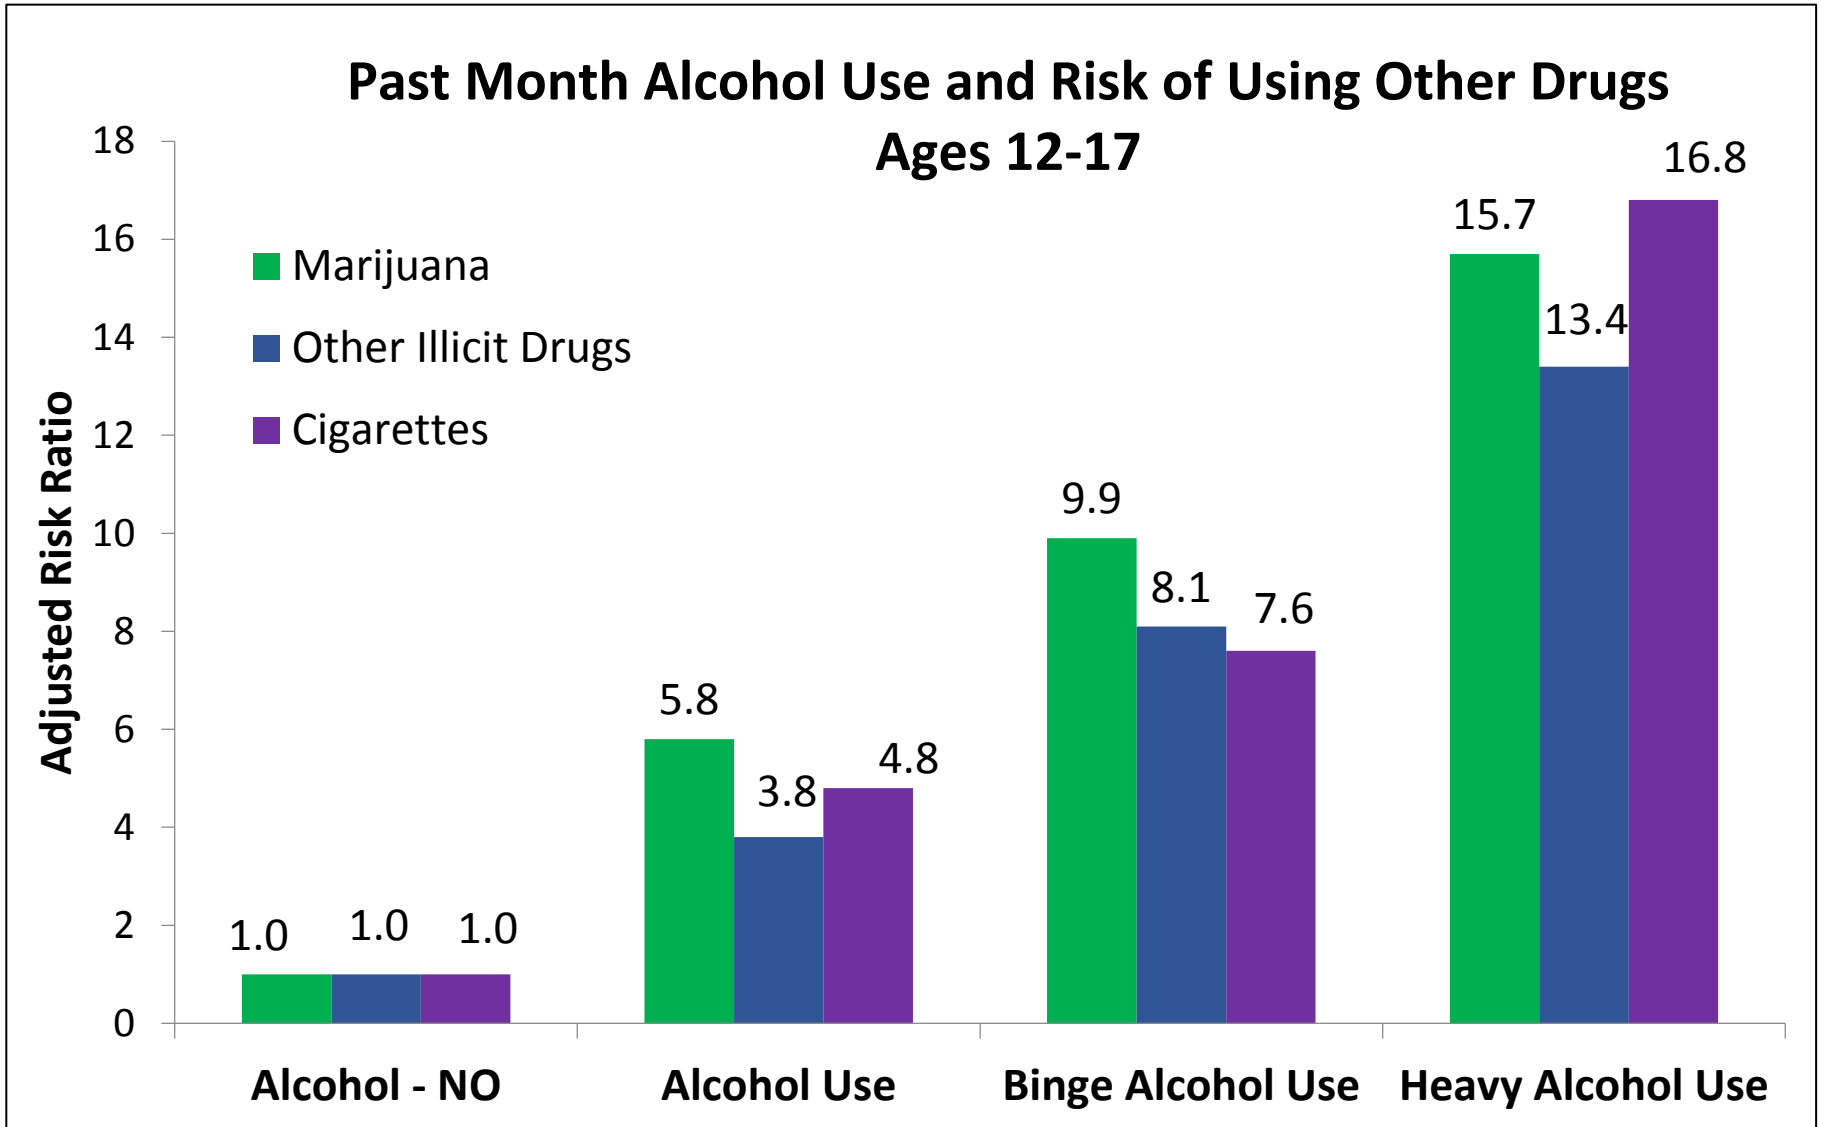

Data from DuPont, Han, Shea, Madras. Preventive Medicine 113: 68-73, 2018. [Graph prepared by BK Madras, C Shea]
Past month use of alcohol, marijuana and illicit drugs, among youth aged 12-17, by level of cigarette use (past month adjusted prevalence; n = 17,000; data from Table 3).

Youth
Marijuana
Use
Increases Risk
of Using
Other Drugs

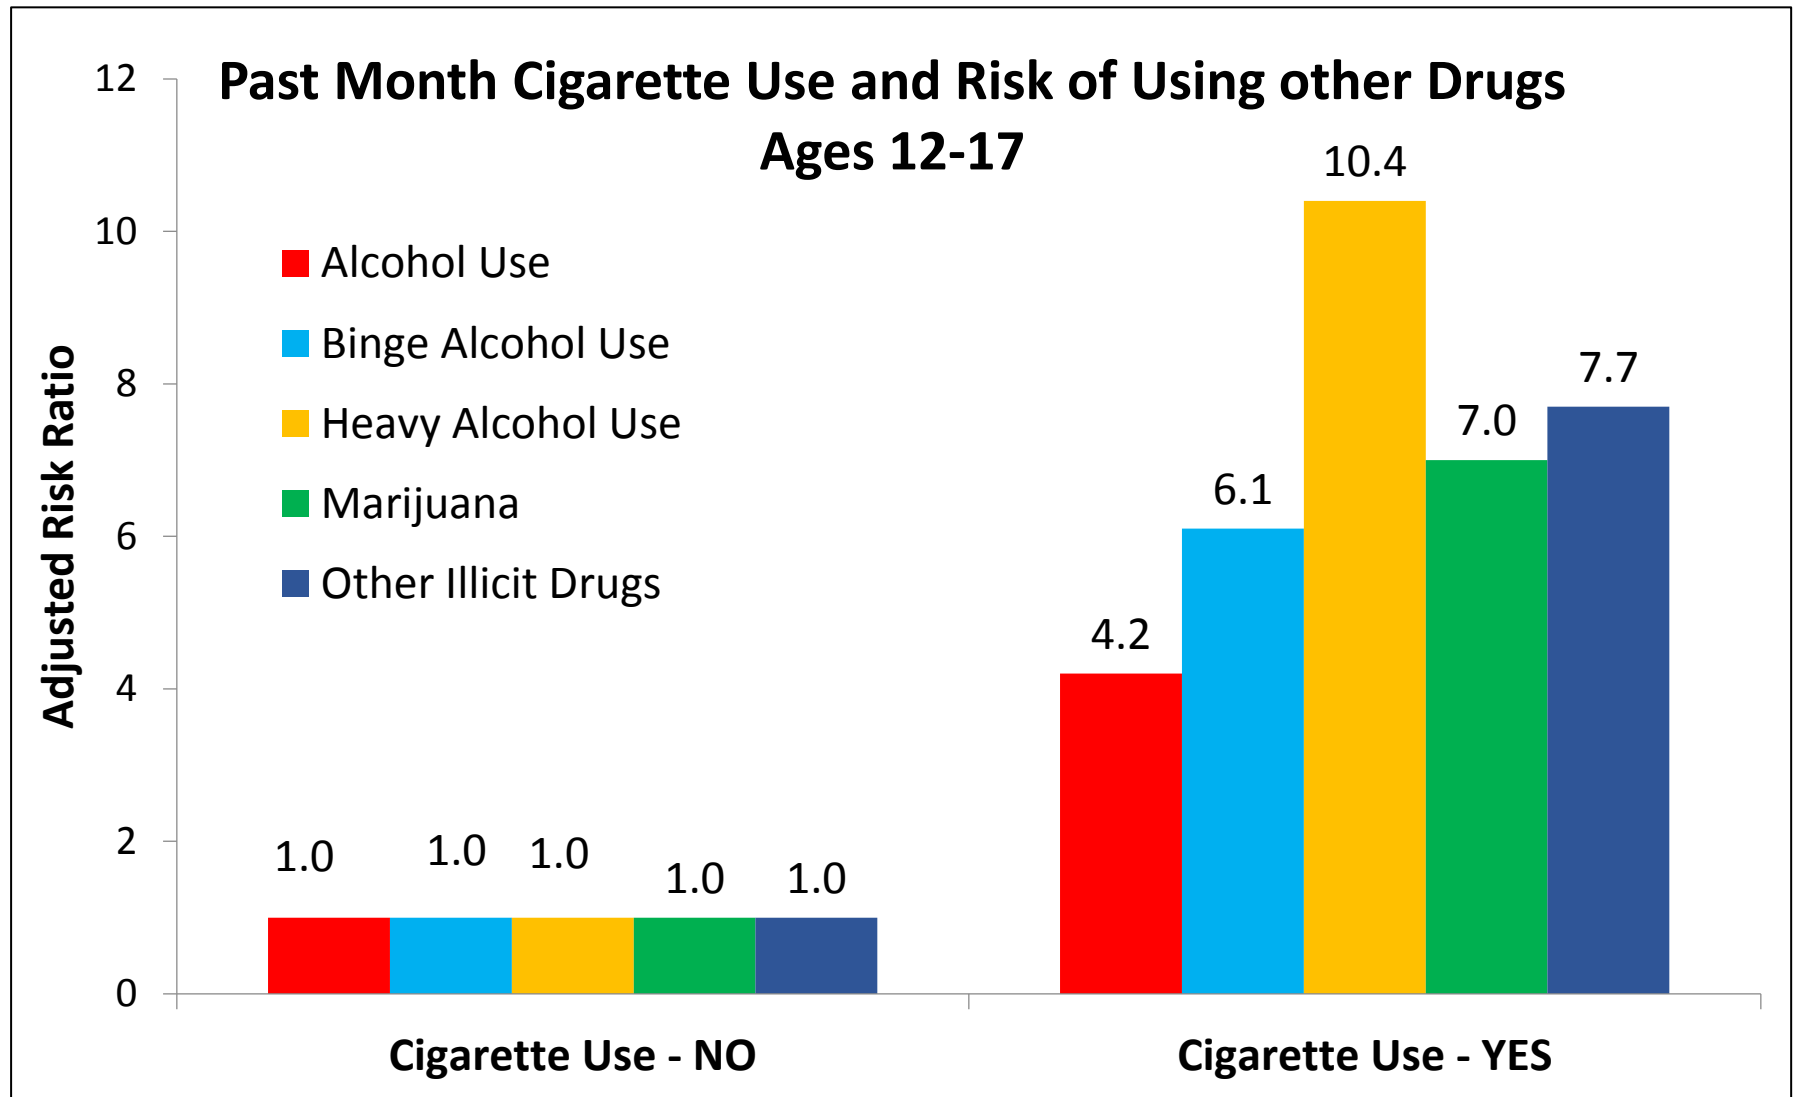

Data from DuPont, Han, Shea, Madras. Preventive Medicine 113: 68-73, 2018. [Graph prepared by BK Madras, C Shea]
Past month use of alcohol, tobacco and illicit drugs, among youth aged 12-17, by marijuana status (**past month adjusted risk ratio**; n = 17,000; data from Table 1)

Youth
Drinking
Increases
Risk of
Using
Other Drugs

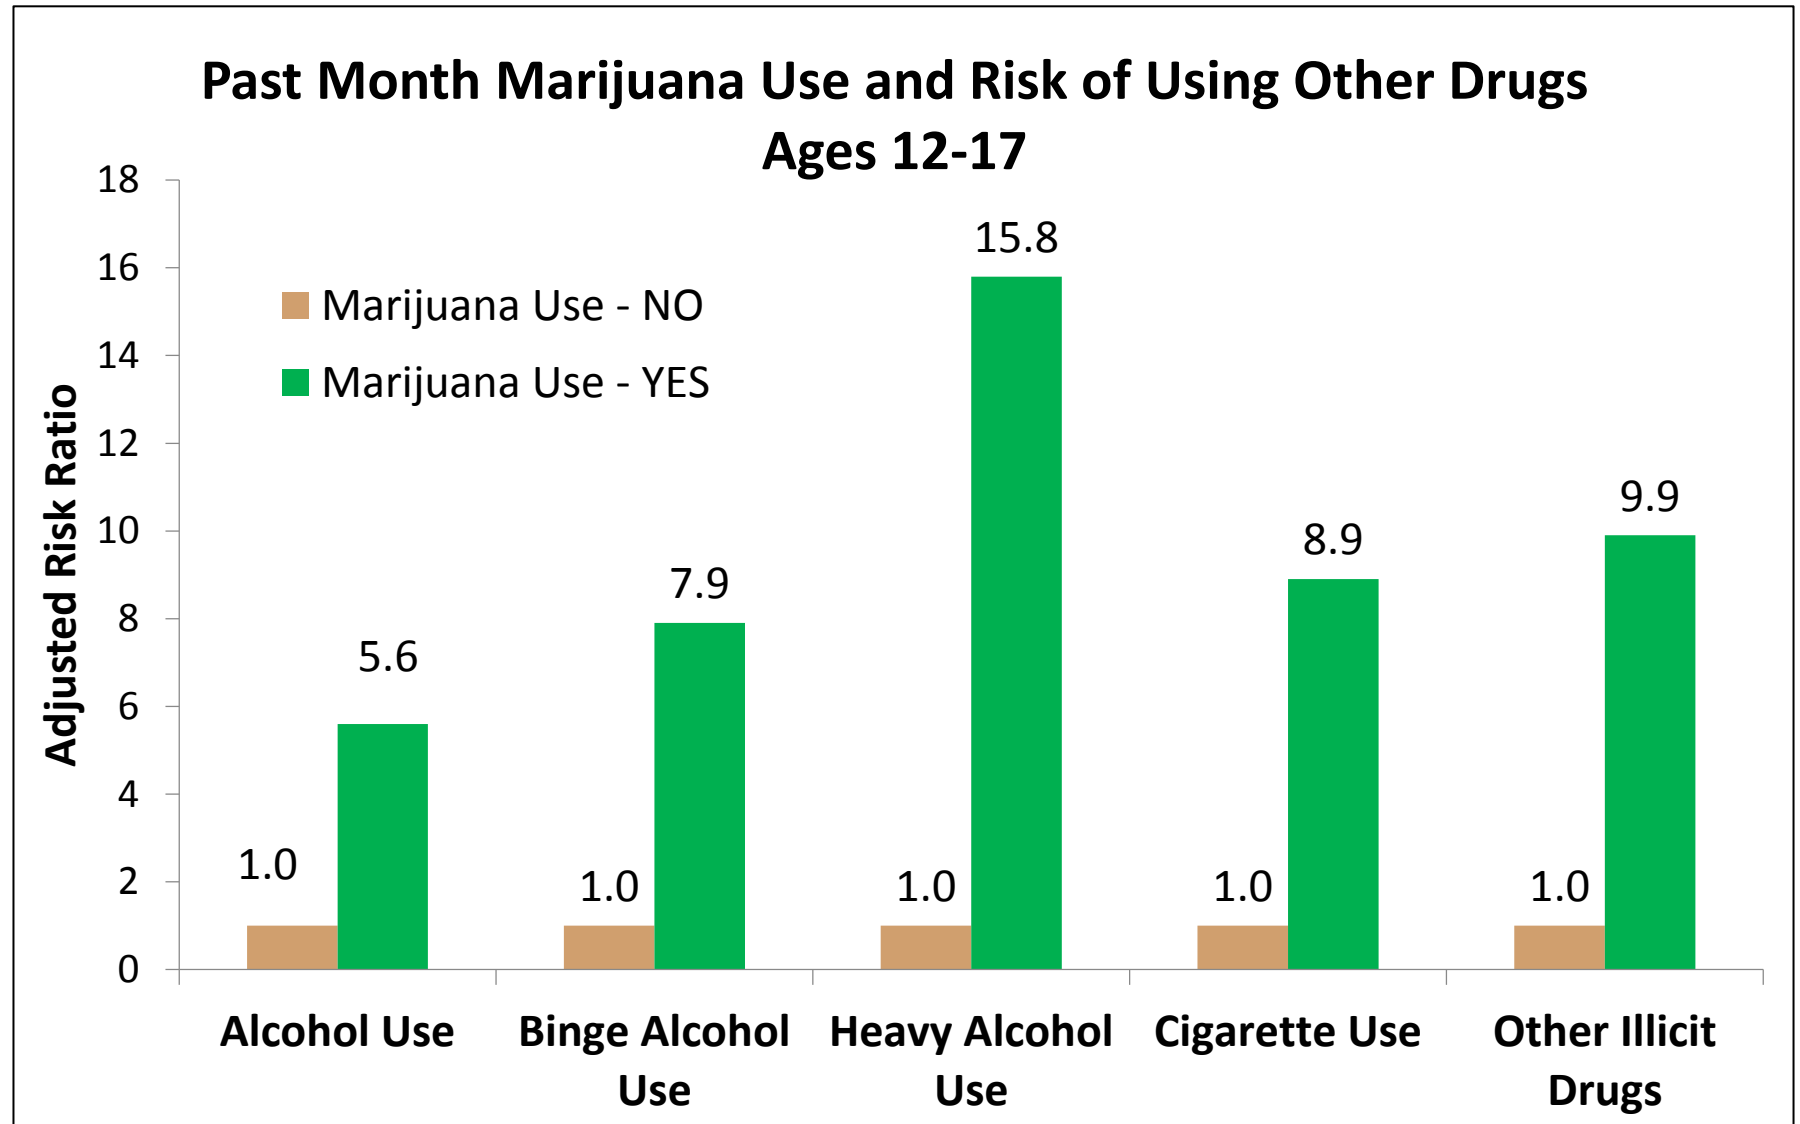

Data from DuPont, Han, Shea, Madras. Preventive Medicine 113: 68-73, 2018. [Graph prepared by BK Madras, C Shea]
Past month use of tobacco, marijuana and illicit drugs, among youth aged 12-17, by level of alcohol use (**past month adjusted risk ratio**; n = 17,000; data from Table 2).
